IRAS PIC Scheme
For SMEs

Investing in an IT infrastructure can be costly for small and medium enterprises (SME). Many companies still rely on externally hosted solutions for their emails, and share files between PCs without a centralised server.

The lack of a centralised email and file sharing infrastructure generates a messy operational environment and impedes control and accessibility of critical documents, especially when they are needed out of the workplace; furthermore it exposes the SME to risks such as loss of data and other issues.

Our Server Solution EMPOWERS YOU to:

- Consolidate all your data and emails within the office in **ONE CENTRALISED LOCATION**.
- **ACCESS AND WORK ON** your critical emails, files and documents from **ANYWHERE IN THE WORLD** via VPN.
- Host your own **PRIVATE CLOUD SERVICE**.

With all these features, you will be at ease when you use our solution.
